# Cursed tome slay the spire

Cursed tome slay the spire reddit.

takeMysteriousSphereFight: Whether to take the fight in the Mysterious Sphere event. eliteRoomWeight monsterRoomWeight restRoomWeight shopRoomWeight eventRoomWeight wingBootsThreshold: One or more charges of Wing Boots are used if they reduce the weight of the path by at least this much. Current Major Restrictions Default seed filtering is very limited. To do something complicated, you must program it yourself. All output will be printed to the program's stdout. Slay the Spire > Suggestions & Ideas > Topic Details Cursed Tome Event - Hints on what to expect Today I beat Ascension 20 with the Ironclad, and I noticed something: on A15+ runs, I nearly never even tried to get the Book. cardsToBuy: These are the only cards which will be bought, in order of priority. When you run a seed yourself, you may notice diverging behavior, especially later on in the run. The path with the lowest weight, obtained by adding the weights for each individual node on the path, is selected. That would also make more sense for the lore. \*Can be achieved with savescum as well, but I don't count that. For example, the following two settings for requiredEvents are both valid: "requiredEvents": ["FaceTrader", "Beggar"], "requiredEvents": ["FaceTrader", "Old Beggar"], Core search parameters ascensionLevel: The ascension level used for the search (0 to 20) playerClass: The class used to search (IRONCLAD, THE SILENT, DEFECT, or WATCHER) startSeed: The first seed to search endSeed: The last seed to search verbose: Whether to print out detailed information about each seed found exitAfterSearch Set to true to cause the program to immediately exit after search every seed highestFloor How many floors into the seed you want to search Navigation These room weights are used to determine which path is taken through each map. Note that the game will not launch. Create a folder named "mods" in your Slay the Spire installation directory if it does not yet exist. EB NAC LI .TNEMAL S'WON DNA PH XAM OT SNOITPO WEN EHHT STIMIL: TNEMALWONECROF .LBALIVA REVEHEW SETIS TAGE REHTEHW: Levohsesu .Tnave Ratla Netogrof EHTI Needlog EHT Edart Ot Rehthw: Ydoolbroflodinedlogedart Esrcuc's GniaG, tneve nedlog eht ni lodi nedlog EHT ESRUCTHW: Esrcutiwlodinedlogekat) Esrcuc's GniaG Tuohitiw Ni Lodi Needlog EHT ET REHTEHW: EsrcorTuohitiwlodinedlogekat.) RequiredAct1Cards: The letters that must be present at some point of act 1 ProhibitAct1Cards: Letters that should not be present at some point of act 1 RequiredLect1RelicS: the relics that must be acquired somewhere in Act 1 RequiredIPotions: Potions that must be Acquired somewhere in Act 1 Requirements: The relics that must be purchased anywhere in the career required: The potions that must be acquired anywhere in the required race: the events that must be found in some place of the required race, that must be found somewhere in the race (eg "The Champ") minimumelites: The minimum number of elites that Maximumelites must be found: the maximum number of elites that minimumcomates can be found: the minimum number of combats (event fighting , normal fighting, elites and bosses) MaximumCombates: The maximum number of minimum combat Estsites: The minimum number of resting sites that OPTIONS output filters must be found, control the information shown when the program is executed. BossRelicStotake: These are the only relics of heads that will be taken, by order of priority. A file called "SearchConfig.json" should have been created in your current work directory. TakecurseDTOME: If taking a book at the CURSED Take event. TakeWarpedtings: If you take the WARPE tongs at the AccurseD BlackSmith event. SEED SEARCH will notify you if an invaded name or ID is provided. General Decisions ReliquiaStobuy: These are the only relics that will be purchased, by order of priority. TakeScrapoZerelic: If you dig for the relic at the SCRIP event OOZE. So for Ironclad, I would not try to get the book if I knew it is an echiridon à è. orThe others are worth more TakemaskedBanditFight: Either to fight against masked bandits (and keep all your gold) in Act 2. 2. Whether to trade all of your gold for the Red Mask in Act 3 if available. Settings These are the descriptions of the settings in searchConfig.json. Some settings take lists of relics, cards, or events. Run the mod once to search the first 100 seeds with some default settings. Maybe let the story of the book be different, depending on which of the 3 it is. You get an unremovable curse for a relic, which virtually never does anything at all. takeAddictRelic: Whether to buy the relic in the Addict event. There is no checking to make sure that you can actually make it to Act 4. alwaysSpawnBottledLightning: Same as above, but for non-basic skills alwaysSpawnBottledFlame: Same as above, but for non-basic attacks Event decisions All of these control which actions are taken at various events in the game. My point is, especially on A15+, you bleed so hard when getting the book, that it only pays off when it's a book which is really helpful. Either I was on too low HP for my taste and/or the next rest site was too far away or I had an important upgrade. There was only one A15+ run where I opted to get the book (ironically, it's the A20 run I succeeded). alwaysSpawnBottledTornado: If set to true, then the player is assumed to always have a power in their deck to make Bottled Tornado spawn. Also, any mod can change the outcome of seeds, so you should not use any mods, including BaseMod, with SeedSearch when searching for seeds to use in unmodded gameplay. showNeowOptions: Shows the neow options that are available showCombats: Shows the monsters and elite monsters that are fought in order showBosses: Shows the bosses that are fought showRelics: Shows the relics obtained showShopRelics: Shows the relics available in the shops showShopCards: Shows the cards available in the shops showShopPotions: Shows the potions available in the shops showBossRelics: Shows the potential boss relics showEvents: Shows the names of the events Shows the cards that the player can choose from the rewards showPotions: Shows the potions obtained from battles and events showOtherCards: Shows the cards the player gets from events and relics showRawRelicPools: Shows the complete list of all relics in the seed in the order they were obtained Warnings When Searching Among seeds, you have to make a lot of assumptions about your choices and game status. For these settings, use the ID (found in the game code and the output of Seed Search) or the name in the selected language of the game. That's why this event didn't help me in my A15+ careers. So my suggestion would be to make a legitimate way\* to see which of the 3 books you're going to get. Note that there is no check to make sure that Act 4 can be unlocked with the selected path. When you run the mod launcher, SeedSearch should appear now. Inflammation, Demon Form, and Juggernaut are always welcome, of course, but when you keep getting burns and ruptures, you'd rather have passed the next break site for an update instead of healing from the Cursed Tome event. But for now, that's not my point. takeBigFishRelic: If you take the relic for the curse at the Big Fish event. A mod that searches through Slay the Spire seeds. takeMindBloomGold: If you take the gold at the Mind Bloom event, if it is available (these 3 options are in order of priority) takeMindBloomFight: If you take the fight at the Mind Bloom event, if the gold was not taken takeMindBloomUpgrade: If you take the upgr at Mind Bloom event, if the other options have not yet been taken tradeGoldenIdolForMoney: Whether to change the Golden Idol to gold at Moai Head event, if available takePortal: Whether to take the portal directly to the boss at Secret Portal event (not yet implemented) numSensoryStoneCards: What tas sllaH sllaH gnidniW ne n'Acidlam al ramot iS :esruC sllaH gnidniW) 3 a 1 (airosneS ardeiP otneve le ne ramot .tneve .tneve tnepresssS eht ni esruc eht rof dlog eht ekat ot rehthw :dloGtnepreSekat .sehcras erutuf fo roivaheb eht lortnoc ot elif taht tideE .J3 ot 0( esoohc ot noitpo woeN hcihW :eciohCwoen .tneve muelosuaM eht ni esruc jelibsoop( eht rof ciler eht ekat ot rehthw :cileRmuelosuaMekat .detcepex si sihT .flesruoy ti elipmoc ro .egap sesaeleR eht morf raj.hcraesdees daolnwod .dom eht llatsni ot egasU dna puteS .4 taC edulcni lliw snur eht neht .eurt ot tes fl :4tca .stsoP )edur ro, gnithgif .tnemssarah( citamelborp dna .gnisitrevda .maps troper ot desu eb ot YLNO si sihT :eton .eno modnar a teg uoy nehv yhsart yltsoM era srewop CI dna - noidirhce top I .tneve niagA teem eW eht ni ciler a rof ni gnihntemos edart ot rehthw :cileRniagAteeMekat tneve yrarbil, eht morf drac a ekat ot rehthw :dracYrarbilLekat tneve relaeD gurD eht ni sdraC 2 mrofsnart ot rehthw :mrofsnarTrelaeDgurDekat tneve relaeD gurD eht morf ciler tngnerTS cinegatuM eht ekat ot rehthw :cileRrelaeDgurDekat muessoloc eht ni thgih boN + revalS eht ekat ot rehthw :thgihMuessolocekat sllaH gnidniW ni sdraC ssendaM eht ekat ot rehthw
